

OBJECTIVE

This is a conservative income based portfolio which aims to deliver money market beating returns and real capital growth to investors. It is suitable for risk averse investors, or those looking to set aside funds for a near term liability. The funds included in this portfolio all exhibit strong risk management expertise and aim to deliver the target return at minimum risk. The portfolio will at times hold a range of instruments across fixed income, credit, listed property and money market investments to maximise income while generating a low level of real capital growth.

INVESTMENT GUIDELINES

** Drawdown is a 10 year calculation (if available)

MODEL FEES

Base Fee (excl VAT):	0.44%
Performance Fee and other costs (excl VAT):	-0.01%
VAT:	0.06%
Model Total Expense Ratio (incl VAT):	0.49%
Transaction costs:	0.01%
Model Total Investment Charge (incl VAT):	0.50%
Discretionary Management Fee (excl VAT):	0.30%

Current Net Yield: 9.70%

The current net yield is calculated as the percentage of the portfolio's historic annual distributions (income and dividends) over the unit price at period end.

These are estimated weighted average fees, based on clean fees at benchmark. Therefore, fees reflected may differ from the end investor's fee due to platform variations on fee classes and rebates. TERs for the underlying funds are calculated on the average annualised costs incurred over the last 3 years, as per ASISA reporting standards, and are therefore not necessarily reflective of the current costs to investors.
