“A fine is a tax,
for doing something wrong”

“A tax is a fine,
for doing something right”

EST. 1930

What is Section 12B?

Section 12B is a tax-incentive provision of the South African Income Tax Act that provides investors with a **100% tax deduction for investment into qualifying solar projects.** The **Section 12B allowance is granted in respect of the cost of equipment** and explicitly requires that electricity generated by the equipment be used in the production of income.

Why invest in Section 12B partnerships?

- **Section 12 B partnerships invest in niche renewable energy projects around SA**
- **Partner with established operators** that have a demonstrable track record of achieving targeted returns
- Investors effectively **own the assets** (solar panels, batteries, inverters etc) through ***en commandite* partnerships**
- Earn **strong, predictable and growing distributions from the underlying Power Purchase Agreements (PPAs)**
- Adding leverage, investors can claim up to a **225% taxable income deduction** for investing in renewable energy projects via Section 12B partnerships. This, remarkably, works out to getting up to **100% of your capital invested returned as a tax refund within 12 months of investing***
- **Expected after-tax IRR's approximately 24% per annum over a 10-year period***
- **Doing good for the country and the environment** (ESG-conscious investment)

** Assumes a marginal tax rate of 45% and on whether leverage is used in the partnership*

EST. 1930

Section 12B Partnership Structure

Limited Partners
(Investor)

As a limited partner, you, the ***investor*** are regarded as having a proportionate interest in solar assets acquired by the partnership based on capital contribution.

Management of Partnership (12B Operator) **General Partner**)

Section 12B *en commandite* Partnership

Long-term Power Purchase Agreements (PPA)

Project A

Project B

Project C

EST. 1930

Who is it for?

- **Individuals** with taxable income over R **1.8** million expected in the current tax year
    - 45% marginal tax rate.
- **Trusts** with looming, large tax liabilities in the current tax year
- Can afford to hold onto the investment for **10+** years
- The investment should be less than **5-10 %** of their overall portfolio
- Selected partnership characteristics (debt levels, income expectation etc) must be commensurate with the investor's risk profile

EST. 1930

Section 12B vs Section 12J

Section 12B - Section 12J Comparison		
	Section 12J	Section 12B
Structure	Fixed Capital Structure	En Commandite Partnerships
Tax Deduction	100%	up to 235%
Holding Period	5 Years	No limit
Annual Investment Limit	R2.5m p.a. for companies & trusts R5m p.a. for individuals	No limit
Capital Gains Tax on Exit	Yes	No
Recoupment Tax on Early Exit	Yes	Yes
Risk	Moderate to High	Moderate to High

EST. 1930

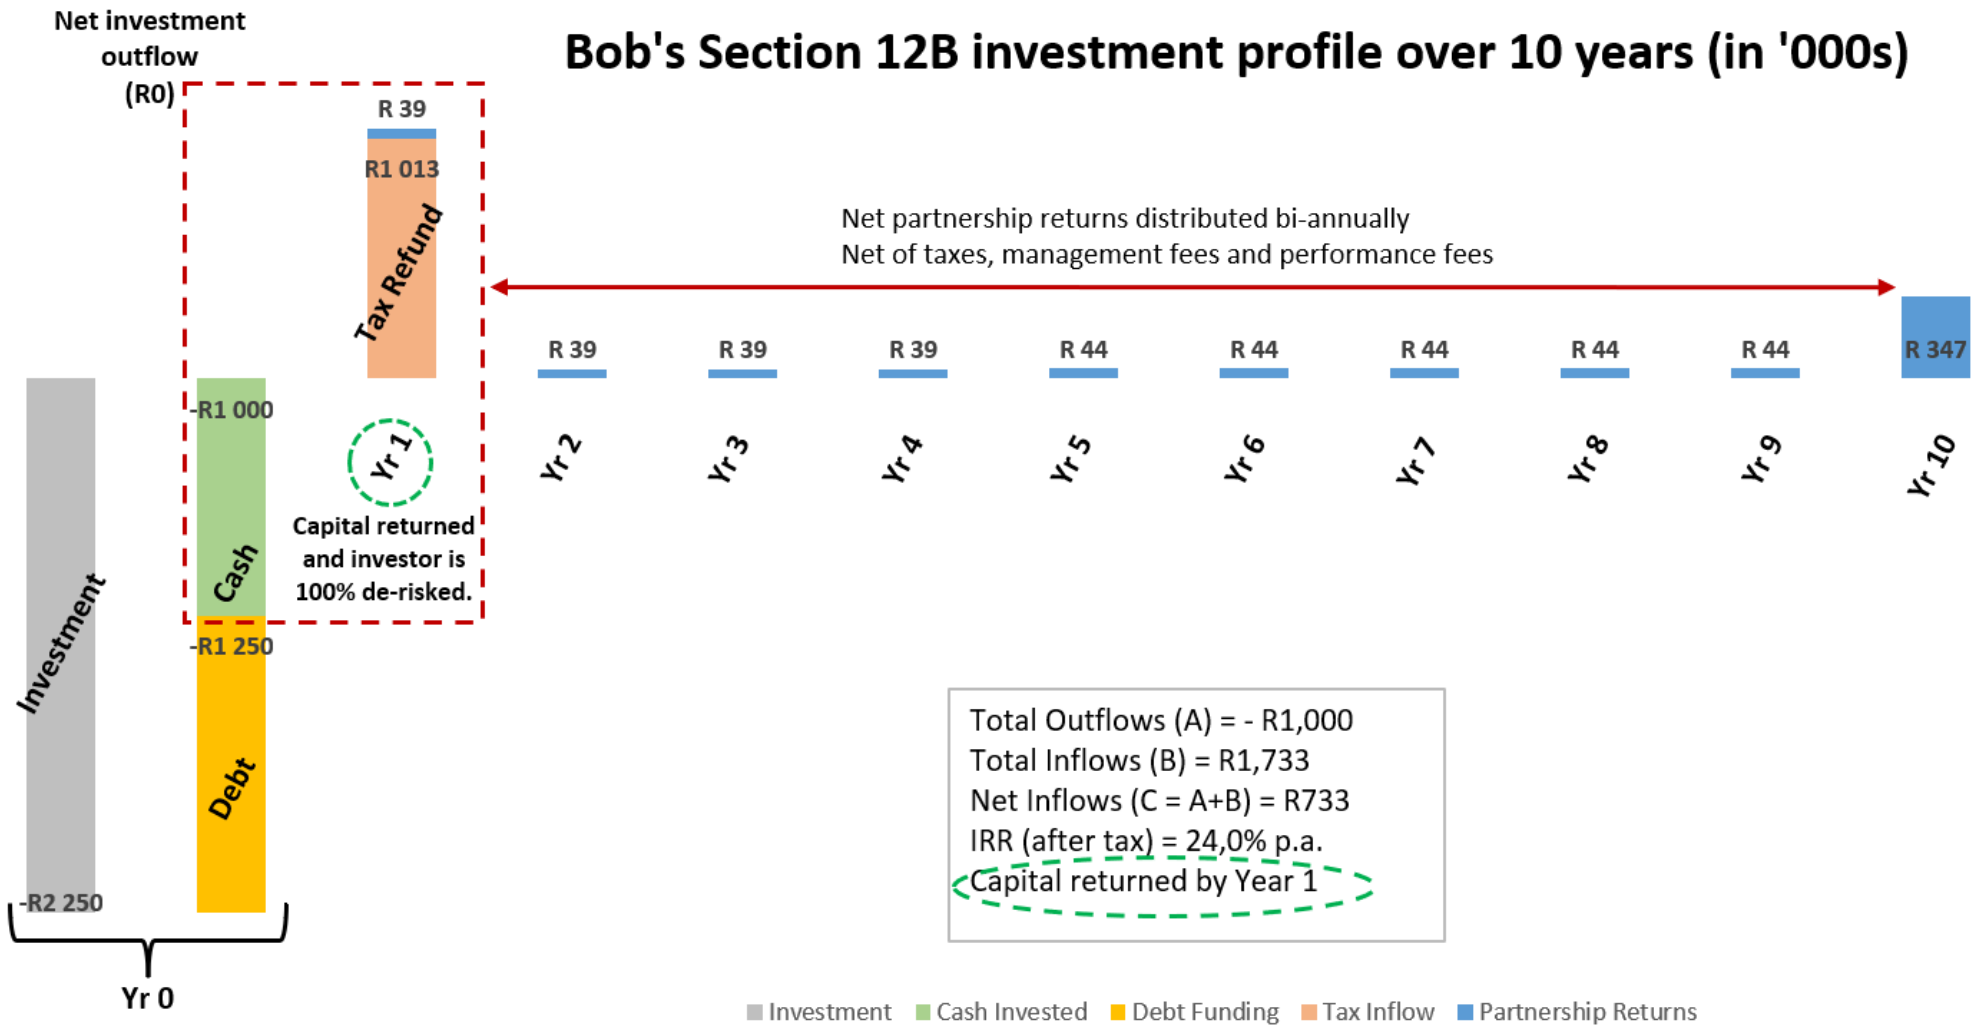

How we think of Section 12B?

- Expected after-tax IRRs of approximately 24% per annum driven by:
  - Upfront tax refund significantly reduces net investment outflow
  - Strong, predictable, and growing distributions
  - Use of leverage to enhance tax deductions and returns
- Alternative investment with a return profile uncorrelated to conventional investments like listed shares, bonds and unit trusts
- Identify reliable and reputable section 12B operators and underlying renewable energy projects that meet our strict investment criteria

EST. 1930

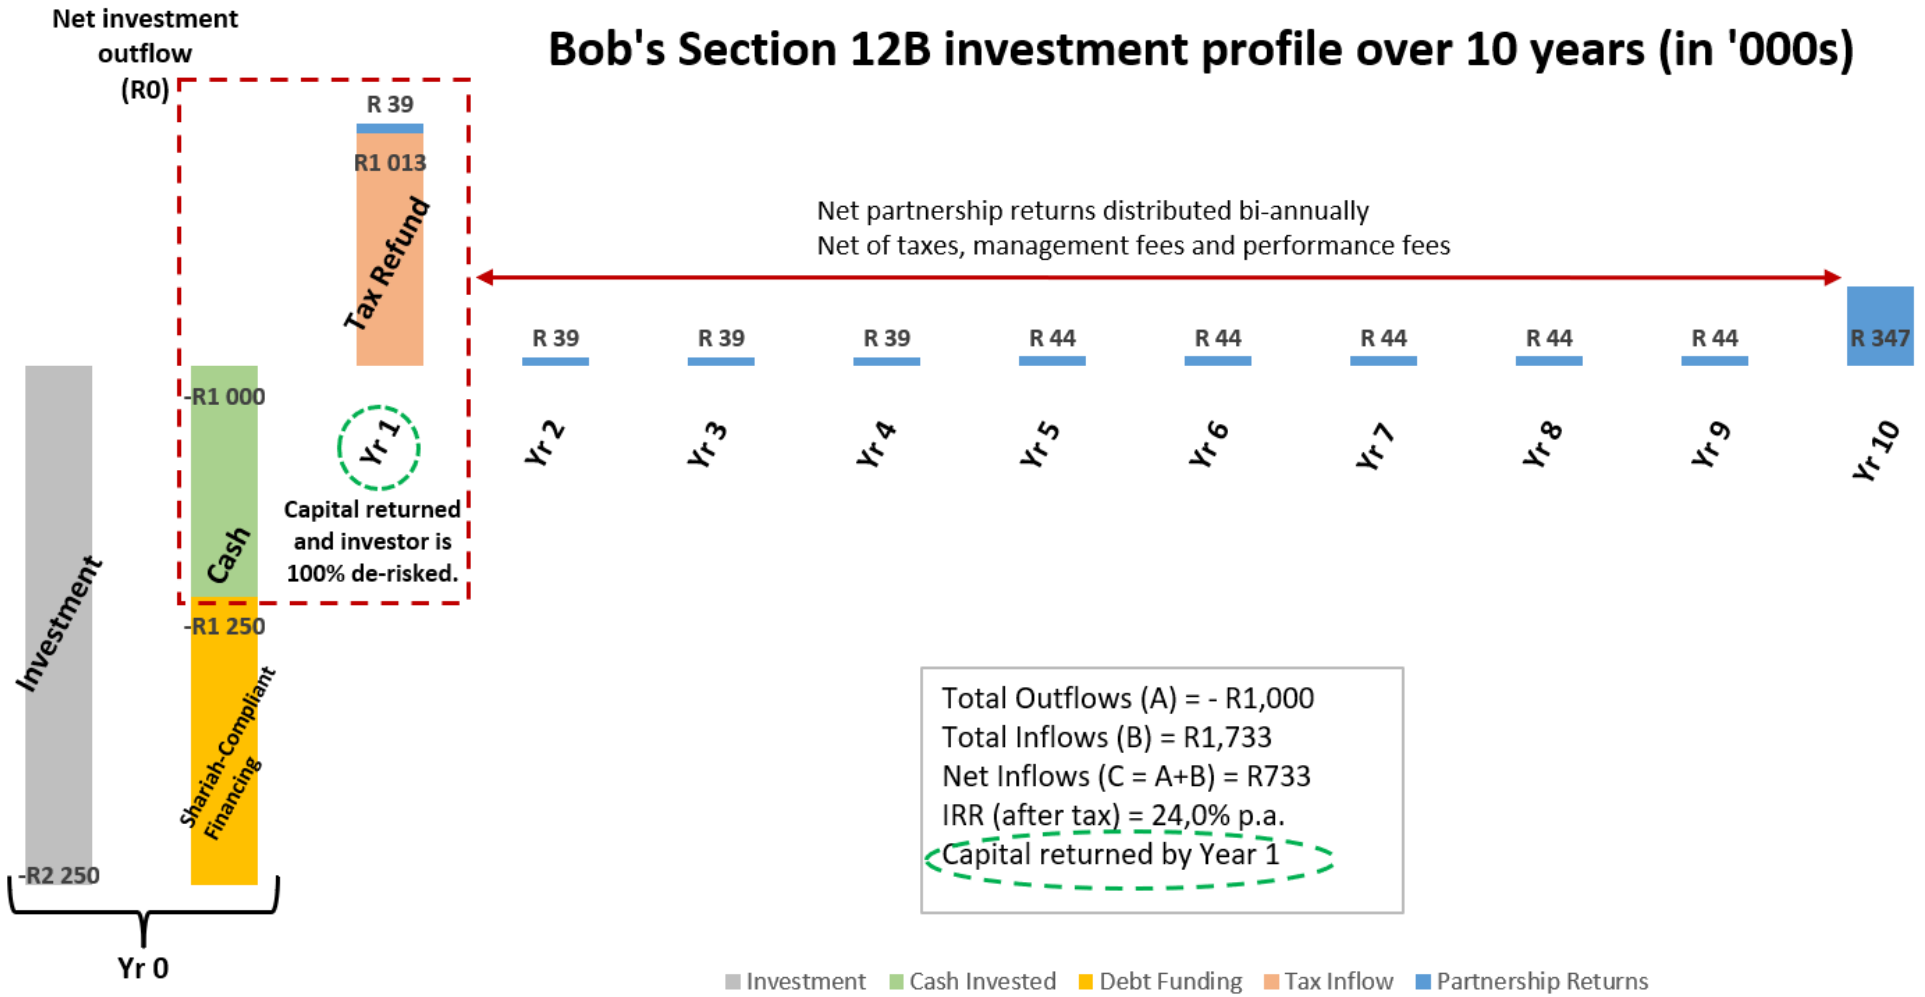

Example:

Bob invests R1,000 into the Grovest Section 12B partnership. The investment leverages 56% of debt versus assets and generates annual cash flows from its portfolio of renewable energy projects. The graph below illustrates the resultant cash flows (net of tax and fees) assuming Bob exits the Fund in 10 years' time. Bob has a 45% marginal tax rate.

Example:

Bob invests R1,000 into the Grovest Shariah Section 12B partnership. The investment uses Shariah-compliant gearing of 56% versus assets and generates annual cash flows from its portfolio of renewable energy projects. The graph below illustrates the resultant cash flows (net of tax and fees) assuming Bob exits the Fund in 10 years' time. Bob has a 45% marginal tax rate.

Section 12B Partnership Due Diligence

The are some of the factors we use to assess the inclusion of any Section 12B fund we recommend:

Partnership Analysis

- General Partner or Operator
  - Experience, expertise, reputation
  - Co-investment
  - Track record
- Corporate Governance
  - Key management
  - Ongoing reporting
- Fees
  - Upfront, ongoing, and upon exit etc
- Exit Strategy
  - Coherent, defined, and aligned
- Income Streams
- Investment Minimums

Project Analysis

- Use of your money
- Project Manager
  - Experience
  - Expertise
  - Reputation
  - Co-invested
- Diversification
  - Geographic
  - Sector
  - Asset Orientation
- Expected returns based on risk taken

EST. 1930

Key Risks

- Late deployment of capital:
  - Tax deduction can only be claimed in the year the renewable energy project is live and producing electricity.
  - The exact tax deduction for the 2027 tax year will only be known in Jan/Feb 2027 (estimates can be used to file provisional tax returns)

- Long-term investment with no guaranteed early liquidity mechanism:
  - Whilst your investment could be repurchased by the Partnership or sold to a 3rd party, it will take time to facilitate and have recoupment tax consequences.

- Default or non-payment by an end-user:
  - Whilst the assets are moveable and can be deployed elsewhere, a customer default will temporarily impact returns.

- Operational risks:
  - Renewable energy assets are electronic systems, any failure of a system at a project level could temporarily impact cash returns depending on the severity.

- Leverage risk:
  - The use of debt within these partnerships adds an additional layer of risk to the investment.

- Unregulated partnership structure
  - The Product does not fall within the ambit of the Financial Advisory and Intermediary Services Act, 37 of 2002 (Act) and is subsequently not regulated under the Act and therefore the protection that may apply in respect of financial products or services in terms of the Act will not apply to the Product. Based on your financial experience, and before you proceed with this transaction, please familiarise yourself with the specific specifications of this product's terms and conditions, to assist you in determining whether, or not, the specific financial product is suitable for you, based on your specific circumstances.
